CORE CAPABILITIES

AI Systems & Agent Building. Production systems across LLMs, RAG, agent orchestration, and MCP. Built Singularity SEO, an AI-managed search platform in production, and open-source agents for market intelligence, book marketing, and satellite terrain analysis. Ships products, not slides.

Brand Voice & Copy Systems. Voice architecture as a system: tone guides, messaging frameworks, brand books, and governance that keep a brand distinct across channels, teams, and AI-assisted workflows. Voices that scale without going flat.

AI Enablement & Adoption. Prompt and agent libraries, role-based playbooks, guardrails, and human-review gates that move teams from AI curiosity to daily use. Moved wary client teams from resistance to routine use, cutting first-draft time by roughly half.

Delivery & Program Leadership. Twenty-five years leading every new-business pitch: strategy, proposals, and presentations that won and held sixty-plus accounts. Teams up to fifteen. Client relationships at owner, board, and C-level, many held a decade-plus.
